PRESS RELEASE

TechnoNova Launches Innovative Smart Home Hub

TechnoNova today announced the release of its new Smart Home Hub, designed to seamlessly connect and control household devices with a single, intuitive interface. The hub integrates voice commands, AI-driven automation, and energy-saving features, making it easier than ever for families to manage their homes efficiently.

“Our mission is to simplify everyday living through technology,” said Elena Markov, CEO of TechnoNova. “This hub represents a major step toward smarter, greener, and more connected households.”

The Smart Home Hub will be available globally starting December 1, with pre-orders opening this week on TechnoNova’s official website.
